

## Nuevos Libros

### **Present Knowledge in Nutrition, Seventh Edition**

Edited by Ekhard E. Ziegler and L.J. Filer, Jr.

ISBN 0-944398-72-3 (order code 398723)

1996, 684 pages, tables, figures, index: \$50.00

The Seventh Edition, following the format of the widely acclaimed Sixth Edition, features the latest available research authored by 83 specialists and recognized authorities. The new edition contains 64 chapters, of which 13 are on new topics, and includes useful new tabular and illustrative material. It is fully referenced and thoroughly indexed to meet the scientific information needs of students and practitioners.

This edition has been significantly expanded to include new chapters on gastrointestinal disorders, nutritional epidemiology, food toxicology, antioxidants, and other evolving areas and new developments. It provides more detailed discussion on lipids, sodium, potassium, and other traditional topics. The new volumen is fully updated with indepth information on important subjects commanding the attention of professionals who must stay informed on the many developments in nutrition science today

Priced at \$50.00, the Seventh Edition of *Present Knowledge in Nutrition* also serves as an affordable reference tool and resource for students. Educational, bookstore, and quantity discounts are available, as are professors' desk copies upon course adoption.

#### **Contents**

- Energy Requirements
- Body Composition
- Hunger, Appetite, and Food Intake
- Obesity
- Carbohydrates
- Dietary Fat
- Essential Dietary Lipids
- Protein and Amino Acids
- Dietary Fiber
- Water
- Vitamin A
- Vitamin D
- Vitamin E
- Vitamin K
- Vitamin C
- Thiamin
- Riboflavin
- Vitamin B-6
- Niacin
- Vitamin B-12
- Folic Acid
- Biotin
- Pantothenic Acid
- Calcium and Phosphorus
- Magnesium

- Salt, Water, and Extracellular Volume Regulation
- Potassium and Its Regulation
- Iron
- Zinc
- Copper
- Selenium
- Fluoride
- Manganese
- Chromium
- Other Trace Elements
- Iodine Deficiency and the Iodine Deficiency Disorders
- Pregnancy and Lactation
- Nutritional Requirements During Infancy
- Adolescence
- Aging and Nutrition
- Exercise
- Atherosclerosis
- Nutritional Aspects of Hypertension
- Diabetes Mellitus
- Nutritional Advances in Osteoporosis and Osteomalacia
- Renal Disease
- Nutrition in Liver Disease
- Cancer and Diet
- Gastrointestinal Disease
- Estimation of Dietary Intake
- Nutritional Epidemiology
- Nutrition Monitoring in the United States
- Enteral and Parenteral Nutrition
- Nutrient-Drug Interactions
- Alcohol: Medical and Nutritional Effects
